Dedicated Transport Acquires All Star Transportation

February 17, 2010

CLEVELAND--Dedicated Transport Holdings, LLC, a portfolio company of Centerfield Capital Partners and Patriot Capital, has acquired All Star Transportation, Inc. Terms of the transaction were not disclosed.

Headquartered in Clearwater, Florida, All Star Transportation provides liquid bulk trucking services to water treatment plants throughout the United States. All Star's management team and 40 drivers will be retained. In addition, the company plans to hire another 20 drivers in the next year.

"We are excited about this acquisition because it fits our growth strategy which calls for Dedicated Transport Holdings to acquire a number of mid-size trucking companies over the next several years," said Frank Wagner, President and Chief Executive Officer of Dedicated Transport. "We also were able to retain good employees with a great work ethic."

"The service All Star Transportation provides its customers throughout the country is unique, serving a niche market that can be replicated with other manufacturers and distributors," commented Tom McDermott, Dedicated Transport's Executive Vice President and Chief Operating Officer.

The acquisition is the second that Dedicated Transport Holdings has made under current ownership. In 2007, it acquired Baker's Transport Service, a Florida-based provider of bulk trucking services to the water treatment and power generation industries.

About Dedicated Transport Holdings
